

GETTING STARTED

STEP 1

If your new kitchen is part of a building renovation then you will, no doubt, have existing plans for us to work from. If you are updating an existing kitchen measure the length, width and ceiling height. Indicate where the windows, doors, sink, waste, power points and gas are located. Draw a sketch as per the example. This doesn't have to be to scale. Alternatively use the supplied graph paper to draw your kitchen to scale.

STEP 2

Write down the make and model number of your existing and/or proposed kitchen appliances in the space provided below. If you don't have a firm idea of your layout or appliances yet, just supply us with the information you have so far.

FRIDGE
MICROWAVE
RANGE HOOD
HOT PLATE
UNDER BENCH OVEN
WALL OVEN
UPRIGHT STOVE
DISHWASHER
SINK
OTHER

STEP 3

Make an appointment to come into our showroom. We will enter these dimensions into our computerised system. Your kitchen will then take shape on-screen before your eyes. We can discuss finishes and supply a quote subject to a final site measure.

Scale: 1 square : 200mm
